SAVANNAH SUITES

Finding Your MAC Address

To take advantage of our wireless high-speed Internet, we'll need your computer's MAC address. This helps us keep our network secure.

Find your computer's operating system from the list below to find your MAC address. Then give us a call or stop by the office with the MAC address and we'll have you online in no time.

Windows NT/2000/2003/XP/Vista

1. Click Start, then Run.

2. Type 'cmd' and click OK.

3. Type 'ipconfig /all' and press Enter.

4. Find 'Wireless Network Connection' or 'Wireless Network Adapter'.

5. Locate the number next to Physical Address, this is your MAC address.

Windows 95/98/ME

1. Click Start, then Run.

2. Type 'winipcfg' and click OK.

3. Find your wireless adapter in the list.

4. Locate the number next to Address Address, this is your MAC address.

Mac OS X

1. From the dock, select System Preferences.

2. Select Network, select location, Select Interface.

3. Select AirPort tab.

4. Locate the number next to AirPort ID, this is your MAC address.
